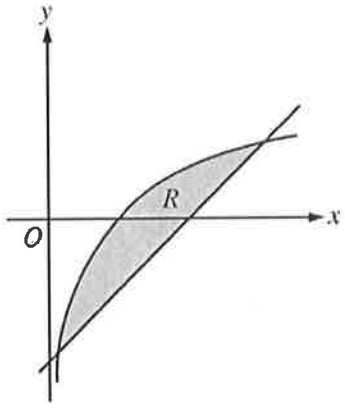
Question 1

Let R be the shaded region bounded by the graph of $y = \ln x$ and the line $y = x - 2$, as shown above.

(a) Find the area of R.

(b) Find the volume of the solid generated when R is rotated about the horizontal line $y = -3$.

(c) Write, but do not evaluate, an integral expression that can be used to find the volume of the solid generated when R is rotated about the y-axis.



$\ln(x) = x - 2$ when $x = 0.15859$ and 3.14619.
Let $S = 0.15859$ and $T = 3.14619$

(a) Area of $R = \int_S^T (\ln(x) - (x-2))\,dx = 1.949$

3 : { 1 : integrand; 1 : limits; 1 : answer }

(b) Volume $= \pi \int_S^T \left((\ln(x)+3)^2 - (x-2+3)^2\right) dx$
$= 34.198$ or 34.199

3 : { 2 : integrand; 1 : limits, constant, and answer }

(c) Volume $= \pi \int_{S-2}^{T-2} \left((y+2)^2 - \left(e^y\right)^2\right) dy$

3 : { 2 : integrand; 1 : limits and constant }
